KEY COMPETENCIES

Collaboration	Biomedical Informatics	Interdisciplinary Projects
Critical Thinking	Data Collection, Analysis	Definitive Decision Making
Communication	Professionalism	Application of Medical Knowledge

EDUCATION

Medicine, Faculty of Medicine,
Manisa Celal Bayar University

2023 - Present
Expected Graduation:2028

Computer Programming,
Izmir University of Economics

2024 - Present
Expected Graduation:2026

Bahcesehir High School

2019-2023

Coding Languages

- SQL
- Python
- Java
- C# Programming

Languages

- English (Full Proficiency)
- Spanish
- German

CERTIFICATIONS

Introduction to Quantum Computing
The Coding School, QxQ, IBM (2020-2021)

Associate Member
Best Buddies International(2022)

MUN Co-Chair
Istanbul, Bahcesehir College(2019)

MedHack Rare Case Diseases Analysis Hackathon
Project Coordination, Application and Research Center, Manisa Celal Bayar University(2025)

HONORS & AWARDS

Plaque of Appreciation
Teknoproje'25, Manisa Celal Bayar University(2025)

CONFERENCE, CONGRESS ATTENDANCES

Neurobridge: Neurosurgery Congress
EMSA Ikcu, İzmir Katip Celebi University(2026)
International Career Summit: Medical Education, European Integration & Culture - National Pillar Meeting
EMSA Medeniyet, Medeniyet University, Istanbul(2026)

MEDDERM: Dermatology Congress
EMSA Manisa, Manisa Celal Bayar University(2026)

Two Ends of a Scalpel: Surgery Congress
Ankara University, Ankara, Turkey(2025)

H.O.P.E: War Medicine Congress
Akdeniz University, Antalya, Turkey(2025)

Forensic Neuropsychology Symposium
Ege University, Faculty of Medicine(2024)

Projects

Project Lead, Teknofest AI in Healthcare Competition(2025-Ongoing)

Gained leadership and project management experience with a multidisciplinary team of various study fields and demographics
Interviewed recruited and managed a project team
Applied my clinical knowledge to coding principles where biomedical expertise is needed
Analyzed and implemented various research results to design a random forest Machine Learning model

Teknofest Innovation in Biotechnology Competition(2025-Ongoing)

Worked with a team of engineering students to design a 3D printed bone regeneration enhancing matrix
Researched on the medical and biotechnological aspects of the project
Applied my medical knowledge to explain various genetic and pharmacological processes to engineering students

Creating and Finding Data for a Microbiology Database in SQL(2024-2025)

Effectively combining life sciences with programming
Designed and implemented a structured database for Microbiological data
Gained experience on Database Structure and Normalization
Collected scientifically factual information about microbiological agents
Enhancing knowledge on Microbiology and Data Science

TUBITAK Polar Research Project(2022)

Designed a survey to test high school students' knowledge on Antarctica, its natural environment, resources and the effects of global warming, pollution and environmental degradation
Produced a report analyzing the results of the survey and came up with strategies to raise awareness
Created a quiz game website to gamify raising awareness about the continent

QOyun Quantum Game Hackathon (2020)

Successfully managed tight deadlines, working in a stressful environment
Collaborated with individuals previously unfamiliar to me, building professional relationships
Ranked 4th among 14 teams of College Students as 2nd year High Schoolers
Designed and developed a snake game with incorporated quantum mechanics using pygame

Quantum Algorithm for High Energy Physics Simulations Hackathon Project(2021)

Explored how Quantum Computing can advance and accelerate research
Read, analyzed and researched on academic papers on Quantum Simulations
Worked to the best of our abilities to create a Simulation working with Markov Chain Monte Carlo method using Qisqit and Python as 3 High School Students
Became familiar with topics such as Quantum Field Theory, Perturbation Theory, intermediate particles and the standard model and their computational models.

MUN Delegate Experiences

Participated in multiple MUN Conferences,
Improved communication and collaboration skills acquired through formulating a resolution as a team
Acquired professional communication skills working with other delegates.
Quick critical thinking shown through formulating responses promptly during debates
Able to regulate stress in a high pressure debate setting and manage multiple high-priority tasks
Can provide certifications from CAKAMUN, OMUN

MUN Co-Chair Experience(2022)

Mentored peers and guided discussions and resolutions, fostering leadership
Demonstrated collaboration co-authoring a Study Guide on the topic of Climate Change while adhering to a deadline, leading the Social, Humanitarian and Cultural Committee as a co-chair.
Established a professional relationship with fellow members of the Executive Board
